

Why Buy Teeter Hang Ups®?

You (or your customers) may find yourself asking, “What sets Teeter Hang Ups apart from the rest of the competition?” Well, now you have the answers...

- **Market Leader.** Teeter Hang Ups® tables have more comfort, quality, and security features than any other inversion tables on the market; from heavy duty triple chrome plated parts to 360 degree welds and stability locks on the pivot and rotational features – there is no other inversion table that can compare.
- **UL Testing.** Teeter Hang Ups® is the only company to offer inversion products that have been listed or classified by [Underwriters Laboratories](#), an independent testing facility. We are proud to say that the F-series Inversion Tables are Classified as UL 2601-1, which is intended for Medical Electrical Equipment, part I; General Requirements for Safety in accordance with Underwriters Laboratories, Inc. Additionally, the Power II Inversion Table is UL Listed 1647, the standard for motor-operated exercise machines.
- **Commitment to Quality.** We have an ongoing contract with a quality assurance-engineering firm that inspects every Teeter Hang Ups® shipment for top quality. This firm has conducted repeated testing on the inversion table with a 300 lb. (135 kg.) robot to simulate 20-years of daily use.
- **Continuous Improvement.** We never stop trying to improve upon our products’ design and function. The F-series Inversion Tables, for example, have benefited from over 70 upgrades to increase quality, ease of assembly and user friendliness.
- **20+ Years Experience.** Teeter Hang Ups® began manufacturing inversion products in 1981, making us the longest continuous supplier of inversion products in the world, and our experience has helped us to make inversion fun, easy and secure.
- **Belief in what we do.** And inversion is all that we do. The president started this company because inversion offered him relief from extreme and reoccurring back pain. Plus, nearly every Teeter Hang Ups® employee inverts on a regular basis.
- **5-Year Warranty.** Our commitment to product quality is unparalleled; that’s why we offer a full 5-year product warranty on every component*.

* All Teeter Hang Ups® products carry a five-year warranty, with the exception of the Power II™, which carries a one-year warranty, and the accessory products (Gym-Ball, FLEX Clubs™, and Over EZ™ Training Handles), which carry a 90-day warranty. Commercial use voids all warranties.

Inversion is the “**quiet side of fitness,**” and it is important for the whole family**. One only needs to invert a few minutes everyday - the benefits begin at the shallow angle of 20 degrees.
